

Hanut 'Extra - Deep' Server Cabinets

The preferred cabinets for rack-mount servers

How Hanut offers you the best value? How Hanut saves you money?

Other server cabinets might appear cheaper or actually be cheaper than my company's Hanut server cabinet but in terms of suitability for purpose, features and price Hanut server cabinets offers you the best value.

I highlight 4 features of Hanut server cabinet that can save you a lot of money (more than Rs. 10,000!!!) to prove our claim.

- **Baying / Coupling capability** **Saving Rs. 5000/- or more**

When you buy 2nd, 3rd, ... Hanut server cabinet you can save Rs. 5000 or more per cabinet thanks to baying / coupling capability of Hanut server cabinets.

Each individually kept server cabinet requires two side panels. But in multi-cabinet configuration, where two or more Hanut server cabinets are kept together, only two side panels (one at each end) are required.

No. Of enclosures coupled together	Saving (no. Of side panels)	Saving (in Rs.) assume 1 side panel = Rs. 2500/=
2	2	5,000
3	4	10,000
4	6	15,000
5	8	20,000

Another benefit of baying: Cabinets kept in multi-cabinet configuration are much more stable than individually kept server cabinets.

Hanut 'Extra - Deep' Server Cabinets

The preferred cabinets for rack-mount servers

- **Integrated vertical cable channels Saving Rs. 2500/-**

With four integrated vertical cable channels available for routing power and data cables in the Hanut server cabinets, there is no need to buy separate vertical cable managers in most installations.

- **Front to back server grade ventilation Saving Rs. 3000/- + Rs. 3000 per year**

To dissipate heat, rack mount servers suck air from the front and exhaust hot air from their rear. Therefore front to back server grade ventilation is a must in all server cabinets. Hanut's 'Airmax' front and rear doors have 64% vent area for effective heat dissipation, which eliminates the need for roof mount fan exhaust kit. The minimum Cost saved in Five Years is as follows: -

Initial Cost (Purchase of Exhaust fan kit)	➤ Rs. 3000/-
Operating Cost	➤ Rs. 2500/- Per Year
Repair / Replacement Cost	➤ Rs. 500/- Per Year
Total Cost (5 years)	➤ Rs 18,000/-

- **Short Rear door Saving Rs. 2000 or more**

In a cabinet with full-length rear door cables have to be routed through the base of the cabinet. Because of insufficient space between the base and the floor, cabinets are often placed on a raised platform. Constructing raised platform takes time and money.

With cables routed through the gap between the short rear door and cabinet's bottom there is no need to put the server cabinet on a raised platform → a major saving of money and time!

Hanut Server cabinets are a smart buy.

Go for peace of mind. Go with the server cabinet specialists. Go for Hanut.

Note: Saving amounts mentioned in this document are approximate. Actual saving depends on server cabinet configuration. Read the legal statement / disclaimer at www.hanut-india.com/legal.asp.
